Module A :: Progress Indicator

Same Day Pickup for orders <\$42

Same Day Pickup for orders >=\$42

Ship

Shipping Information → Payment Information → Order Review → Order Confirmation

Same Day Pickup & Ship Mixed Order

Pickup or Ship → Payment Information → Order Review → Order Confirmation

Notes: The Progress Indicator accurately reflects the checkout flow based on the fulfillment method. User's current location within the Checkout process is highlighted. Subsequent steps in the process are reflected in form of labels. Upon proceeding to the following step within the Checkout process, user may choose to go back by clicking the labels associated with previously completed steps.

The variations above illustrate how the Progress Indicator will change depending on the type of the order.

Module B :: Page Title

Page Title & Error Message

Page Title
Error message placeholder

Notes: Each page within the Checkout process has a title matching the step within the Progress Indicator.

In the event of a potential page error, etc., a descriptive error message will appear in the Error message placeholder informing the user of what has occurred and how the problem can be mitigated.

Page Title, Error Message and Products List

Page Title (For Your Prints, Calendars, Photo Books)
Error message placeholder

Notes: New functionality: For Pickup Information and Shipping Information screens, page titles are accompanied by a list of product categories to which that fulfillment method applies (i.e. Pickup Information (Your Prints and Photo Book), Shipping Information (Your Gifts)).

In the event of a potential page error, etc., a descriptive error message will appear in the Error message placeholder informing the user of what has occurred and how the problem can be mitigated.

Module D :: Primary & Secondary Calls To Action

<< SCTA PCTA

Notes: The Primary Call To Action (PCTA) is displayed in form of a button, while the Secondary Call To Action (SCTA) is a link. This module appears in the same way for both locations (top - above Module E and bottom - below the lowest visual point of Module D).

Error message placeholder

[More Info](#)

Notes: User has the ability to enter a coupon code in Cart and throughout the Checkout process, until they reach the Order Confirmation page. The Add Coupons form is always exposed.

After entering the coupon code, user presses Apply, which then displays a green coupon message along with the amount deducted, provided that the coupon code is valid. The "more info" link also appears, so that the user may view additional information about the coupon code, the products it applies to, etc. This information appears in a modal layer and contains both a description of the offer which is pulled from the coupon request spreadsheet that Michelle Wente enters into SBM, and the offer's effective dates, which are pulled from the coupon setup system.

In the event of a potential error in processing, etc., a descriptive error message will appear in the Error message placeholder informing the user of what has occurred and how the problem can be mitigated. A More Info link appears after the error message. Clicking it produces a modal explaining the nature of the error. This information appears in a modal layer and contains both a description of the offer which is pulled from the coupon request spreadsheet that Michelle Wente enters into SBM, and the offer's effective dates, which are pulled from the coupon setup system.

Module F :: Pickup Information Module

Pickup Information

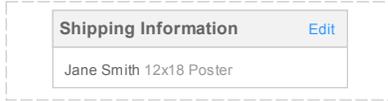

[Edit](#)

Mon. Apr. 1, 2012 after 5:59pm
Glossy Prints, 24x36 Poster

Notes: The Pickup Information module displays the pickup date/time information along with a list of products selected for pickup. Selecting the Edit link transports the user to the Pickup Information section of the Checkout process.

Module G :: Shipping Information Module

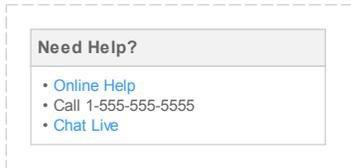

Shipping Address

A screenshot of the Shipping Information module. It features a header "Shipping Information" with an "Edit" link to its right. Below the header, the text "Jane Smith 12x18 Poster" is displayed.

Notes: The Shipping Information module displays first and last name of the person the selected items are being shipped to. It also includes a list of products selected for shipping. Selecting the Edit link transports the user to the Shipping Information section of the Checkout process.

Module I :: Customer Help Module

A screenshot of the "Need Help?" module. The header "Need Help?" is followed by a list of three links: "Online Help", "Call 1-555-555-5555", and "Chat Live".

Notes: The above module provides multi-channel customer service options for the user.

Clicking the Online Help Page link produces the Mail Order modal (current functionality)
Address: <https://photo2.walgreens.com/walgreens/helpcheckoutpopup/>

Clicking the Chat Live link produces the live chat modal (current functionality)

Address (dynamic?): <https://cs6b.instantservice.com/>

client/174257876/67C06724B4C8B3E42FF310D2FE2BF2459D8FEB7B5E61F2BE9CC61F98CC286F390000139BAB0EEFE

Module J :: Secondary Order Total Module

A screenshot of the Secondary Order Total module. It shows the text "Total" followed by a tax note "*<<Tax estimated copy>>" and a price placeholder "\$x.xx".

Notes: The above module displays order Total just above the bottom instance of Module D. Tax estimated copy appears as in current functionality.

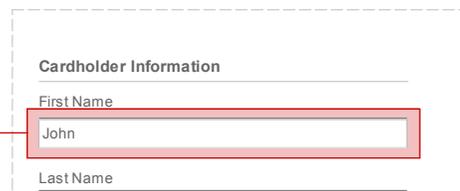

Form Design Guidelines

Empty Form

An empty form titled "Cardholder Information". It has two input fields: "First Name" and "Last Name". The "First Name" field is highlighted with a red border.

Pre-Populated Form

A pre-populated form titled "Cardholder Information". It has two input fields: "First Name" and "Last Name". The "First Name" field is pre-filled with "John" and highlighted with a red border.

Notes: Forms are displayed with field labels above the fields. By default, all empty editable text boxes display sample formatted text in light gray (light gray / italic - visual design will determine the proper approach). Upon clicking within the text field (focusing), the sample text disappears and user is able to enter desired information. If focus of the field is lost without entering new information, the sample text is displayed again.

Error / optional Confirmation message appears under each page's title, with the affected field (if applicable) outlined by a red box.

Annotations

Module A :: Photo Finish Selection

Notes: The Select Photo Finish module has been moved to the top of the page in order to better communicate that its selection applies to both the Quick Order and the Custom Order modules. The Glossy option is selected by default.

Module B :: Quick Order Module

Notes: The quick order module displays three most common print sizes. The Update All button has been removed. With selection of a size, the system updates the order summary with the number of prints, their size, and the total dollar amount, as in current functionality.

Module C :: Custom Order Module

Default State

Individual Prints and Enlargements
 Select desired print sizes for each of your photos.
 Please note: Sizes marked with are not recommended for printing.

<input type="text" value="0"/> 8x10	<input type="text" value="0"/> 20x30															

Notes: Clicking the More sizes link expands the Print and Poster modules to display the remaining options. Subsequently, clicking the Fewer sizes link collapses the module back to its original state.

If user comes to the DPP from one of the following PDPs, the Print and Poster modules will be expanded by default:
 Wallet Prints
 Ultimate Pack Prints
 24x36 Poster

Clicking the Poster preview link produces the Poster Preview modal (currently the More Options link).

Module D :: Prints Summary Copy

Notes: Copy communicates to the user that they'll be able to apply coupons once in Checkout.

Module E :: Pricing

Notes: In addition to current pricing information, the Pricing module will display SDP and Delivered To You tiered pricing for 4x6 prints.

Module A :: Pickup Information

Known Pickup Information - Pickup Location

<< Pick Up or Ship? >>
Error message placeholder

Pick up my order

 Pickup Information

Thursday
October 18, 2012

456 Washington St.
Chicago, IL 60601 [Map](#) | [Change Store](#)

Store Hours:
Mon.- Sun. 8AM - Midnight

Any time after 1PM

Any time after 5pm

I would like a friend to pick up this order.

Glossy Prints
24x36 Poster

Ship my entire order instead

Notes: The above module displays preferred (previously used) pickup location information including store's address and hours. Additionally, the module allows users to view the store's location on the map via the Map link, or change the preferred store location via the Change Store link. The pickup time and "I would like a friend to pick up this order" check box are rolled into the module.

In the event of a potential error in processing, etc., a descriptive error message will appear in the Confirm/Error message placeholder informing the user of what has occurred and how the problem can be mitigated. A confirmation message will be displayed in the same place if a user has successfully changed the pickup location.

Clicking the Map link produces Store Locator modal with the store's location on highlighted on the map as in current functionality. Clicking the Change Store link produces the Store Locator modal with the ability to find a new location, as in current functionality.

Refer to the latest Store Locator wireframes (ex. LOCATOR_Wireframes_v0.1_12XXXX_MC.pdf). Wires are located in the following folder on the I: drive: I:\EcomShare\PUBLIC\User Experience\02 PROJECTS\03 PHOTO\Store Locator Results Improvement 1209\Wires and Specs

Selecting Pickup Time

The system should display available pickup times to the user. Once a time selection has been made, the system should hold that time, or a variation of that time throughout the duration of the checkout process. The system should never prompt the user to change the pickup time or display the "pickup time is no longer available" message to the user if the time difference is less than 15 minutes. In the event when the pickup time has changed by less than 15 minutes by the time user reaches the Order Review page, the system should simply update the pickup time to reflect that change.

Any time after 1PM

Store Hours:
Mon. - Sun. 8AM - Midnight

Any time after 5pm

I would like a friend to pick up this order.

Glossy Prints
24x36 Poster

Ship my entire order instead

Notes: The above module provides users with the ability to place the order for someone else. Selecting the "I would like a friend to pick up this order." check box produces a form allowing users to fill out customer information (current functionality). However, if user has previously ordered for a friend, the information saved at that point will be displayed in text format when the check box is selected.

In the event of a potential error in processing, etc., a descriptive error message will appear in the Error message placeholder informing the user of what has occurred and how the problem can be mitigated.

John Smith [Edit](#) | [Address Book](#)
 1-773-555-5555
 jsmith@email.com

Note: We will only use your friend's email address to notify them when their order is ready for pickup.

[Glossy Prints](#)
[24x36 Poster](#)

Notes: By default, the "I would like a friend to pick up this order" check box is unselected.

Check Box Selected State: By default, all editable text boxes display sample formatting text in light gray. Upon clicking within the text field (focusing), the sample text disappears and user is able to enter desired information. If focus of the field is lost without entering new information, the sample text is displayed again.

Saved Information State: This state appears if user checks the "I would like a friend to pick up this order" after previously filling out the "Order for a friend?" form information. Clicking the Edit link on the Saved Information State form reverts back to Check Box Selected State with previously specified information filled out in editable text boxes. Clicking the Address Book link produces the Address Book modal (current functionality).

In the event of a potential error in processing, etc., a descriptive error message will appear in the Error message placeholder informing the user of what has occurred and how the problem can be mitigated.

Unknown Pickup Information

<<Pick Up or Ship?>>

<<Pick up or ship?>>

Pick up my order

 Pickup Information

Enter your ZIP code or a street address to find a Walgreens store.

[Find a Pickup Location](#)

I would like a friend to pick up this order.

[Glossy Prints](#)
[24x36 Poster](#)

Ship my entire order instead

Notes: In case preferred pickup location information is not available for the user, the above module displays a single text field responsible for collecting map search criteria in form of a ZIP code or street address and city.

New functionality: This single field takes over for the four separate fields currently used to collect ZIP code OR street, city and state (dropdown).

Upon filling in required information and clicking the "Find a Pickup Location" button, current functionality kicks in by producing the Store Locator modal.

After selecting a desired store from the Store Locator, the modal closes and the page refreshes displaying accurate pickup information, options for desired pickup time and the "Order for a friend" option modules.

In the event of a potential error in processing, etc., a descriptive error message will appear in the Error message placeholder informing the user of what has occurred and how the problem can be mitigated.

Shipped Order - Known Shipping Address

W Photo Gift Card

The screenshot shows a payment form with three radio button options: "Credit Card Information", "Gift card", and "PayPal". The "Gift card" option is selected and highlighted in grey. To the right of the "Gift card" header is the "W photo" logo. Below the header, there are four input fields for the "Gift Card Number" and one for the "Security Code". To the right of the "Security Code" field are the links "Check Balance | Remove". Below the input fields is a link that says "+ Add another Walgreens W Photo™ Gift Card". At the bottom right of the form is a blue "Apply" button. The "PayPal" option is unselected and is located below the "Gift card" section.

Notes: Selecting the Walgreens W Photo Gift Card option displays the gift card form (current functionality). User may enter multiple Gift Card numbers. Clicking the "Apply" button applies the gift card available balance to the order total, displaying the updated information in the Order Summary module.

New functionality: Reformat the Gift Card entry method to display 4, not 5 text fields. This approach will match Gift Card numbering format. Clicking the Security Code link displays a modal explaining what the code is and how to find it on the gift card.

PayPal

The screenshot shows a payment form with three radio button options: "Credit Card Information", "Gift Card", and "PayPal". The "PayPal" option is selected and highlighted in grey. To the right of the "PayPal" header is the "PayPal" logo. Below the header, there is a link that says "Continue to enter your PayPal information." The "Credit Card Information" and "Gift Card" options are unselected and located above the "PayPal" section.

Notes: Selecting the PayPal option allows users to pay using PayPal (current functionality).

Notes: The Order Review module presents all relevant information for an order. For Pickup orders, surface pickup date, time and location along with payment information and amount to be paid in store. For Shipped orders surface shipping address along with shipping method(s) along with contact and payment information.

Selecting Pickup Time

The system should display available pickup times to the user. Once a time selection has been made, the system should hold that time, or a variation of that time throughout the duration of the checkout process. The system should never prompt the user to change the pickup time or display the "pickup time is no longer available" message to the user if the time difference is less than 15 minutes. In the event when the pickup time has changed by less than 15 minutes by the time user reaches the Order Review page, the system should simply update the pickup time to reflect that change.
